

# Preferred™ Series Whole-Home Dehumidifiers

Remove up to 100 pints of airborne moisture per day for enhanced comfort and healthier home air

Models DEHXXCDA1080  
DEHXXCDA1100

## Benefits of a **BRYANT DEHUMIDIFIER**

Bryant whole-home dehumidifiers meet stringent ENERGY STAR® requirements and have been awarded with the ENERGY STAR MOST EFFICIENT 2024 designation. Products carrying this distinction have been recognized for their outstanding energy efficiency and technological innovation.

### **Humidity Management**

Humidity from cooking, bathing, showering, outside air, normal breathing and perspiration can build up inside your home, affecting both comfort and indoor air quality.

### **Comfort**

Your air conditioner or heat pump dehumidifies your home during the cooling process. A Preferred Series whole-home dehumidifier draws additional moisture from indoor air for increased comfort from your cooling system and helps it run more efficiently.

### **Healthier Air**

Keeping humidity under wraps can improve the quality of the air you breathe by helping keep mold, dust mites and some allergens under control.\* It can also protect against warping or structural damage to wood flooring or furnishings.

### **Versatility**

As a stand-alone solution, a Bryant dehumidifier can easily address humidity in problem areas such as a basement, crawl space or attic. Or as a whole-home solution, the unit is connected to your homes' heating and cooling system to provide a convenient, effective whole-home dehumidification solution. And in a whole-home solution setup, it can also provide fresh air ventilation when connected to the HVAC system.

### **Efficiency**

Keeping summertime humidity in check can help you feel more comfortable without overcooling your home. You might even be able to turn the thermostat up a few degrees help save on energy costs.

### **Limited Warranty**

To the original owner, our Preferred Series whole-home dehumidifiers are covered by a five-year parts limited warranty. See warranty certificate at [bryant.com](http://bryant.com) for complete details and restrictions.

# Outstanding performance **WHATEVER** the season.

If you could look inside a Bryant Preferred Series whole-home dehumidifier, you'd see what drives the performance: a serious commitment to quality. The aluminum coil provides lasting dehumidification with corrosion-resistant construction that extends the life of the refrigeration system. The unit works effectively using a low Global Warming Potential (GWP) refrigerant per EPA regulations. And, the included MERV 8 filter helps keep the coil and motor free from dust and debris to keep the system operating at its best.

## APPLICATION VERSATILITY

Bryant dehumidifiers offer real solutions to meet a variety of installation needs.

### Ducted to the Heating and Cooling System\*

As a whole-home approach, the dehumidifier is integrated into your heating and cooling system. Integrated in an attic, closet, basement, crawlspace or garage, this application is the most effective way to combat oppressive humidity in the entire home.

### Ducted Stand Alone\*

Our dehumidifiers can also be installed as a ducted dehumidification solution when placed in a specific problem area of the home such as the basement, crawlspace or attic as a stand-alone solution, to quietly remove moisture and improve indoor comfort.

\* Requires proper drainage outlet.

## BRYANT COMFORT SOLUTIONS

As a stand-alone solution, a Preferred Series dehumidifier is easy to operate using the convenient on-board control. For your convenience, an optional external control can be installed in a more centralized location. Or, when the dehumidifier is integrated into your heating and cooling system, you can control it using a compatible Bryant thermostat. See the chart below for more detailed product specifications. Your local Bryant dealer will recommend which one is right for you.
